MODERN NAIL BRAND

AT KINETICS, WE'RE ALL ABOUT
CREATING MODERN NAIL PRODUCTS.

Innovations

Our lab is at the heart of everything we do. With an in-house R&D team of 17 chemists, we develop over 500 formulas every year. A significant part of our innovation is dedicated to creating safer products, using the cleanest and safest raw materials available. We were the first to remove TMPTA and TPO from our formulas, the first to introduce HEMA-free gel polish, and the first to introduce Biobased gel polish.

Modern nails

We believe in a clean, minimalistic nail aesthetic, created with modern products and modern techniques. We are passionate about modern colors. For the past eight years, we have brought fashion trends to the nails by launching four collections per year. Our products are trusted by celebrity nail artists and have appeared on red carpets, and Vogue covers.

Minimalistic design

Our design is clean, minimal, and simple. We believe that good design is timeless – and functional. That's why we invest in creating ergonomic solutions meant to last 5, 10, or even 20 years. Our SolarGel bottle and Perfumed Lotion packaging were introduced 15 years ago – and remain just as relevant today.

Simplicity and honesty define us. Challenges move us forward.

ACRYLICS

Polymer

These truly distinctive colors give the nail high definition when combined with a monomer. These polymers will not crystalize in warm, cold, dry, or humid climates. Polymer Dynamite White creates a sharp, competition-quality French manicure look. The finest blend of particles allows for a self-leveling, smooth application that requires little to no filing.
